Dear Mission of Mercy Supporter,

Imagine being repeatedly turned down by multiple area medical facilities when sickness and other health issues are attacking your body. What feeling of hope do you have to receive care, to find relief, to be healed physically, or even just to be treated with dignity? Where do you go? These feelings of hopelessness and of having no choices can be devastating.

Mission of Mercy (MOM) has been providing healing care to patients with insufficient or no insurance coverage for the past 28 years, beginning in Maryland and Pennsylvania and then expanding to Arizona and Texas. Thousands of patients are treated each year at no personal cost. The diverse care Mission of Mercy clinics provide includes medical, dental, vision, nutritional training, and mental health care.* MOM’s 13 clinics in three regions are staffed almost exclusively by volunteer MD’s and RN’s who are focused, not only on our patients’ physical health, but on restoring their dignity and healing with God’s Love.

Our organization has successfully provided unparalleled quality, free healthcare by adapting and evolving through the years. And we must keep moving forward. An evolution is occurring as some of our long-time medical and administrative volunteers and staff are retiring. Twenty-eight years is a long time to give! The dedication of our departing staff has allowed sufficient training and oversight for new staff to learn their duties. And while deeply appreciating the foundation our experienced staff and volunteers have provided, the fresh ideas and energy of the new staff and volunteers, coupled with our time-tested methods of service and program delivery, will take Mission of Mercy to even higher levels in the healthcare field. It is really exciting!

Your generous contributions in time, funding, and other resources have made Mission of Mercy financially stronger than it has ever been. We have been able to continue being the place our patients come for free healthcare and to have their dignity restored. Our dedicated and passionate staff and volunteers give so much of themselves because of your support and belief in them, and in our mission. On behalf of our Board of Directors, our staff, and our volunteers I sincerely say, “Thank You” for helping save the lives of so many in your communities.

Sincerely,

Andy Crocker
Chair – Mission of Mercy Board of Directors

*Note: Not all mentioned services are provided in all clinic location.
